

**IN THE CLAIMS:**

Please note that the amended claims are shown below in clean form for clarity. A marked up version of the claim amendments is attached.

Please cancel claims 20-23, without prejudice or disclaimer. Applicants reserve the right to pursue the subject matter of these claims in one or more related applications.

Please amend claims 1 and 2 to appear as follows.

1. (Two Times Amended) A method for producing a filamentous bacterium exhibiting reduced branching and fragment septation during growth, said method comprising:

providing a filamentous bacterium, said filamentous bacterium lacking significant endogenous ssgA activity, with the capability of having or expressing heterologous SsgA-activity, which activity, in *Streptomyces griseus*, is encoded by an ssgA gene having at least the sequence:
